

Introduction

The NEBOSH Health and Safety Management for Construction course is the benchmark for health and safety in construction management. It continues to train learners looking to climb the construction ladder into management.

Who is the course for?

The NEBOSH Health and Safety Management for Construction course is for everyone. For managers, supervisors, and workers in the construction sector, the course will add tremendous weight to your skillset and compliment your CV.

It's ideal for anyone who needs a broad understanding of construction health and safety issues to manage day-to-day risks effectively.

Benefits for Learners

- ▶ Advise on duties and manage construction risks under the Construction (Design and Management) Regulations 2015;
- ▶ Justify the need for health and safety improvements;
- ▶ Produce or contribute to a construction phase plan;
- ▶ Help your organisation to manage contractors;
- ▶ Positively influence health and safety culture and behaviour;
- ▶ Carry out a risk assessment of a construction site and manage a range of construction hazards;
- ▶ Recognise workplace changes and their impacts and understand how to minimise these impacts;
- ▶ Develop basic safe systems of work that include emergency arrangements and know when to use a permit-to-work system; and
- ▶ Take part in incident investigations.

Benefits for Employers

- ▶ Make a real difference for your employees with a safer working environment.
- ▶ Comply with the latest health and safety regulations. The syllabus has been strongly aligned to the Construction (Design and Management) Regulations 2015.
